Excerpt: . . . and it is advisable to remove them soon after birth. A HEAD--Th head should be in proportion to the body, but not massive; clean cut, moderately broad between the eyes. Forehead, seen from the front, only slightly arched, with a slight (sometimes scarcely noticeable) depression down the middle, and viewed from the side it slants gradually downward from the top of the skull towards the muzzle. Cheeks slightly rounded towards the front, but not prominent. Muzzle, wedge shaped, long and lean; the bridge of the nose straight and almost parallel with an imaginary line extending from the forehead. Jaws strong. Lips tight and dry, not hanging. Teeth strong, regular and meeting evenly, not overshot. Ears of medium size, wide at the base, placed well up on the head, ending in a sharp point; carried erect when at attention and open towards the-front. A drooping or Collie...
