Especially the establishment of the EMU has led to numerous academic publications. An intense political but also scientific discussion arose about the Stability and Growth Pact of the European Monetary Union. In March 2005 the ministers of finance and economics of the European Union decided to form the Stability and Growth Pact in a more flexible way. In the future countries that are above the 3 % limit should be judged as individual cases. In the academic discussion few economists already claim this, to be the pact's death. The paper starts by providing some basic facts about the terms of the pact and its application during the last years. Chapter 4 provides a short overview about the theoretical background to the field, which can be simplified as Monetarism vs. Keynesian Economics. The main research question is, how we should deal with the pact. Should it be kept like it is today Or are there good options to change the pact In chapter 5 I will point out the most important arguments for keeping the pact and for changing it. Chapter 6 finally goes into the latest academic discussion about a reform of the pact and presents different approaches in doing so. 24 pp. Englisch.
